## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffmann et al (6848410).

Hoffman et al disclose a plurality of resonators 13 (see figures 2 and 3) comprising resonating members 14 (note, all materials have some degree of gas permeability) with opening(s) 18 adjacent a dash panel 19.

Claims 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-82202.

Figure 1 show a resonance passage 1 and a changeover valve 5. All materials have some degree of gas permeability.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoffmann et al.

The tuning of the resonance passages are deemed matters of engineering design. One of ordinary skill in the art would be able to determine the acoustical effects of a given resonance
